

## Choose Your Terminal Build the Perfect Scale

When paired with the right terminal and connectivity option, PBD769 weighing platforms are excellent stand-alone solutions for many industries and applications.

### Bench/Portable Terminals

Intuitive menus and robust design make these easy-to-use terminals a natural choice for weighing tasks, such as counting, checkweighing and totalizing.

### Windows based Terminals

The intelligent IND890 PC weigh scale terminals support Windows-based applications, enabling development of custom interfaces to meet a multitude of weighing needs.

### Process Terminals

Designed for performance and versatility, this terminal is easy to integrate into industrial weighing systems and processes.

# 3-in-1 Scale

## Optimize your Processes

The PBD769 series can replace, three 3'000e approved scales, saving space and costs, while speeding up your processes. Even more, when a tare load is applied, the scale automatically starts to weigh with the smallest readability. Set up as a single range scale, the approvable readability is as high as 7'500e. In non-legal-for-trade applications, stable resolutions of up to 150'000d can be achieved.

**Heavy Weight**  
Third weighing range from e.g. 30 to 60kg with a readability of 20g: When tarring in any range the smallest readability of e.g. 5g is applied again.

**Low Weight**  
First weighing range with lowest readability. Benefit from an approved readability of e.g. 5g up to 15kg on a 60kg platform.

**Medium Weight**  
Second weighing range from e.g. 15 to 30kg with a readability of 10g: This characteristic saves you the space and the investment for a second, separate scale.

**Efficient Formulation**  
Weigh heavier basic components and valuable, small doses of ingredients on one scale, always with the required accuracy.

**Accurate Filling**  
Fill small and large containers at tight tolerances without switching platforms. Using the filling bar and stored target values creates accurate results faster.

**Precise Checkweighing**  
The scale supports efficient checkweighing applications. When attached to an ICS terminal, the display with colorWeight® feature ensures easy-to-read error free results.

**Fast Dynamic Weighing**  
The unique mechanical design of the PBD769 platform series allows for stable weighing results even in fast dynamic conveyor applications. It facilitates high throughput and faster processes.

**Accurate Piece Counting**  
With its 3-in-1 concept, this scale allows you to count exact quantities of large and small parts on one scale. Verify incoming goods, keep track of stock movements and monitor production output.

**Check Package Completeness**  
We ensure that you can keep your quality promise. Accurately fill customer orders with exactly the right number of pieces, on time and with the required labels.

# Functional Design

## Accurate Results in Tough Environments

Our scales are designed to grant stable accuracy even under unfavorable operating conditions. The unique construction in combination with a high-performing load cell make it suitable for a variety of challenging environments including areas that are highly humid, need regular cleaning and are subject to harsh wash-down procedures.

### Reliable Performance

The robust and reliable lever system facilitates excellent corner- and side-load stability, which makes this platform an excellent solution for many dynamic and static installations.

### Increased Throughput

Fast stabilization times and update rates guarantee short cycle times in many static and dynamic applications.

### Hygiene Matters

The high-grade stainless-steel load plate with its machined brushed surface features a low surface roughness, which avoids corrosion and makes it easy to clean.

### Sophisticated mechanical protection for reliable weighing

These stainless steel platforms feature different 4 shock-absorbing systems to eliminate the negative influence of static and dynamic impacts on the weighing result.

### Various Sizes and Capacities

We offer mechanical layouts for different sizes and capacities to achieve the best possible performance for your needs.

### The Heart of the Platform

The high-performing digital load cell is the core of the PBD769 weighing platforms. This technology guarantees high precision and reliability even in wet and harsh environments.

# High Variability and Accuracy

## Fulfill All Your Requirements

### Technical Specification

<b>Resolution (max. recommended)</b>	150,000d
<b>Ingress Protection</b>	IP66/68
<b>Material</b>	Frame / load plate: Stainless steel AISI304 Load cell: stainless steel (AISI304), brushed, e-polished
<b>Load Plate Surface</b>	Ra <= 0,8µm (welding lines excluded)
<b>Cable Length</b>	2,5 m (default), max. length: 30 m
<b>Interface</b>	SICSpro / RS422
<b>Update Rate</b>	Up to 90 ups
<b>Suitable Indicators</b>	SICSpro: MT SICSpro terminals IDNet: ICS_5, ICS_9, IND570, IND780, IND690 (Q4/2017)
<b>Temperature Range</b>	0°C – 40°C
<b>Available Options</b>	Load plate: AISI316, dynamic load plate Interface: SICSpro with cable adaptor SICSpro-IDNet Cable length: 5m, 10m, 20m Test certificate

### Standard Configurations

Model	Platform size	Maximum Capacity					
		15	30	60	120	150	300
PBD769-AB	280 x 350 [mm]						
PBD769-B	400 x 500 [mm]						
PBD769-CC	600 x 800 [mm]						
<b>Approvable Readability</b>							
Class III, 3 x 3,000e Multi-Interval	[kg/g]	3 kg / 1 g 6 kg / 2 g 15 kg / 5 g	6 kg / 2 g 15 kg / 5 g 30 kg / 10 g	15 kg / 5 g 30 kg / 10 g 60 kg / 20 g	30 kg / 10 g 60 kg / 20 g 120 kg / 50 g	30 kg / 10 g 60 kg / 20 g 150 kg / 50 g	60 kg / 20 g 150 kg / 50 g 300 kg / 100 g
Min. Capacity (Approved platforms only)	[g]	20 g	40 g	100 g	200 g	200 g	400 g
Class III, 6,000e / 7,500e Single Range	[g]	2 g	5 g	10 g	20 g	20 g	50 g
Min. Capacity (Approved platforms only)	[g]	40 g	100 g	200 g	400 g	400 g	1 000 g
<b>Readability (min. recommended)</b>							
Up to 150,000d	[g]	0.1	0.2	0.5	1	1	2
<b>Typical Values*</b>							
Repeatability sd (at max. load)	[g]	0.1	0.3	0.4	0.8	1.0	1.7
Error of Indication Typ. (at half load)	[g]	0.2	0.4	1.1	1.9	1.9	4.5
Error of Indication Typ. (at full load)	[g]	0.5	0.8	1.7	2.3	2.9	7.4

Zero setting range= +/- 2% of max. capacity; Preload range: 18% of max. capacity; Taring range subtractive from 0 to max. capacity  
\*At room temperature and stable environmental conditions without vibration and draft, with automated weight placement
